

The Common Council.

Board of Aldermen held their first meeting of the session this evening, and will in all probability adjourn till after the celebration of the Fourth. We have nothing special that is expected to come up after the building of the New City Hall will be passed before the next Common Council will be elected. The site, it has been already wisely determined, is in the Park. The weather is too sultry for water, and as several of the Aldermen are busy for many months, we may expect a light session of the Common Council. Amongst the Aldermen are Aldermen Brown, First ward, who is held for the position of sheriff; Howard, Sixth Street Commissioner, in which he has a forerunner in John H. Chambers, the Deputy of the Board of Aldermen, who is also seeing that the Board of Aldermen, of the Ninth ward, has not for the Commissioner; and Mr. Flagg has just announced a horse, the Aldermen think he would be a good objection, if pressed by the city what a Comptroller ought to be.

The reports long expected and anxiously for one from the Committee on Ferries, who under consideration, for several months past, of increased accommodation on the Hamilton ferry. The memorial sets forth that from P. M. the boats run only every four hours up to noon, when they cease for the night. There is a population, not only in that portion of Brooklyn, but a vast number of Long Island farmers who rely on the boats to run from 2 to 3 o'clock in the morning, they may reach the market at a late hour to sell to retail dealers. The Union Company are monopolists; they are very wealthy, influential that they "managed" to defeat a memorial when before the committee of the last session. We hope they will not be so successful with the new session.

Board of Councilmen also commence their meeting this evening. The meetings of the Board will be held successively night after night, till the end of the session. It is not to be expected that more meetings will be held during the term, as our reports are not the men to do more work than they are able to do. They will not work while the mercury runs up higher than the thermometer. There is not a very heavy or important before the Board for this month. The reports considered are mostly in regard to improvements, with which are two or three reports from the Public Health in regard to filling in swamps. This is a full page to the history of the Board of Councilmen for this month.

The Law Courts.

Sumner v. Sumner has commenced in the State, and we shall have no trial terms in any of the months of July and August—in the Superior there will be none until October; yet there will be a trial at the chambers of all the courts, and motions heard and writs of habeas corpus granted, and occasional decision on cases argued at special term. The law courts will be held at the chambers of the courts, and motions heard and writs of habeas corpus granted, and occasional decision on cases argued at special term. The law courts will be held at the chambers of the courts, and motions heard and writs of habeas corpus granted, and occasional decision on cases argued at special term.

Fire Marshal's Office.

INVESTIGATION INTO THE CAUSE OF FIRES. FIRE IN VOGEL STREET.—On the 10th day of May last, between 12 and 1 o'clock A. M., a fire broke out in the building No. 58 Vogel St., a fire extended to the adjoining building, consuming both of them and their contents. Upon a thorough investigation it appears from the testimony of Mr. Francis Stouvenel, that about a year ago he removed some woodwork from the building, and placed it in the chimney, and that the fire was caused by the woodwork taking fire from the chimney. The fire was caused by the woodwork taking fire from the chimney. The fire was caused by the woodwork taking fire from the chimney.

Fire in Madison Street.

Between two and three o'clock on the morning of the 24th May, a fire was discovered in the cellar of the grocery store No. 167 Madison street. It was extinguished with but trifling damage. Patrick Crawford was arrested on suspicion of setting fire to the premises, by the Seventh ward police, upon investigation it was found that the fire was caused by the chimney, and that the fire was caused by the chimney, and that the fire was caused by the chimney.

Fire in Ann Street.

The building No. 49 Ann street, and contents, was destroyed on the evening of the 30th May last, and from the fact of the fire originating in the cellar, it was supposed that the fire was caused by the chimney, and that the fire was caused by the chimney, and that the fire was caused by the chimney.

Fire in Jersey City.

On the 10th of July, in Jersey City, a fire was discovered in the cellar of the grocery store No. 167 Madison street. It was extinguished with but trifling damage. Patrick Crawford was arrested on suspicion of setting fire to the premises, by the Seventh ward police, upon investigation it was found that the fire was caused by the chimney, and that the fire was caused by the chimney, and that the fire was caused by the chimney.

Dramatic and Musical Matters.

The past week was signalled by the final closing of the Academy of Music. It is very certain that of late the Opera has been much popularized in this city, and we have reason to hope for something still more brilliant next season. Meanwhile some of the artists will return to Europe, others will seek rural retirement or marine luxuries "by the sea and waves." The last opera was on Friday last, when "Don Giovanni" was given by the La Grange company.

The English Opera at Niblo's is doing a fair business. "The Daughter of Saint Mark" has been withdrawn, and it will be succeeded this evening by Buckstone and Fitzwilliam's comic opera, "The Queen of the Day," which we believe has never been sung in this country. Miss Louisa Pyna has the principal part. In addition to the music of the piece, Miss Pyna will introduce the far famed song of "The Sky Lark."

At the Broadway Theatre Mr. and Mrs. Barney Williams have appeared during the week, to the satisfaction of large numbers of the people. These artists have received offers of engagements from Mr. Benjamin Webster, of the Adelphi, London, and Mr. J. B. Buckstone, of the Haymarket, which they cannot, on account of home engagements, accept at present. Mrs. Barney Williams will not leave the city until the 10th inst.

At the Bowery Theatre, the melodramatic spectacle, "The Enchanted Temple," has been very well got up, and it draws full houses. DONNA VALERIE GOMEZ is in town and will shortly give a concert. Mr. J. H. McVicker, the Yankee comedian, arrived in town lately, and will soon sail for Europe. He will act one of the London theatres early in the autumn.

Mr. McVicker is the proprietor of the plays written for the late Mr. Danforth Marble, and since the death of Mr. Marble, and Marble, he stands almost alone in the representation of the same. The Londoners will find him "Brother Jonathan all over." THEATRICAL GOSPEL.—Mr. Davidge and Mr. John Brougham left town last week for Canada. Mr. Davidge commences a star engagement at the Metropolitan theatre this evening, and from thence he will go to Buffalo. Mr. Hackett will open the Metropolitan theatre on the Fourth.

Mr. Hackett will open the Metropolitan theatre on the Fourth. The troupe, numbering forty artists, appear at the Metropolitan theatre, on Monday, July 2. After the troupe engaged, we hear that this company will play at the Broadway theatre in this city, when Gabriel will take his leave of the American stage and of this country. The Boston Evening Gazette says:—W. E. Burton, the well-known comedian and manager, visited this city this week in his military capacity of Paymaster of the N. Y. City Guard. His reception last evening at the Metropolitan theatre was very successful, and when the band in compliment to him struck up "Willkommen and his Dinah," there seemed no bounds to the enthusiasm.

A theatrical party was given at Wilmington, Del., for a sum of money to be raised for the benefit of the theatre. The party was given at Wilmington, Del., for a sum of money to be raised for the benefit of the theatre. The party was given at Wilmington, Del., for a sum of money to be raised for the benefit of the theatre.

THE THIRTY-THIRD ANNUAL MEETING HELD DURING WHIT-WEEK at one of the houses on the Lower Rhine—one of the most important gatherings of the class in Germany—took place at Düsseldorf. The hall where the musical performances are held—one of the most picturesque temporary wooden rooms, the secret of erecting and demolishing which belongs to Germany—was filled with a garden, and behind it and in front of the stage, and behind it and in front of the stage, and behind it and in front of the stage.

Coroner's Inquests.

Coroner Wilhelm held an inquest upon the body of Christopher Stiller, who was run over and killed on the Hudson River Railroad, on Saturday morning. The evidence adduced went to show that the deceased, while returning from his home, was struck by a train, and that the train was under the control of the engineer, who was not at the time of the accident.

On the Prohibitory Liquor Law.

Dr. Cheever, Mayor of Manhattan, delivered a sermon last evening, at the church of the Puritans, Union Square, on the moral aspects of the Prohibitory Liquor Law. The discourse was given before a large number of the advocates of the new law. Dr. Cheever took his text from Ecclesiastes, chap. 8, verse 2:— "I counsel thee to keep thyself from wine."

The speaker commenced by saying that the government is made the spontaneous growth of a society, and that the society is made the spontaneous growth of a society, and that the society is made the spontaneous growth of a society, and that the society is made the spontaneous growth of a society.

The speaker then proceeded to discuss the moral aspects of the Prohibitory Liquor Law, and to show that the law is a necessary and just measure for the preservation of the public health and the moral character of the community.

Dr. Cheever then concluded his discourse by exhorting the people to support the Prohibitory Liquor Law, and to abstain from the use of intoxicating liquors.

Dr. Cheever's discourse was well received by the audience, and it was decided to hold a public meeting on the subject of the Prohibitory Liquor Law, at the church of the Puritans, Union Square, on the 10th inst.

Dr. Cheever's discourse was well received by the audience, and it was decided to hold a public meeting on the subject of the Prohibitory Liquor Law, at the church of the Puritans, Union Square, on the 10th inst.

Shocking Tragedy in Brooklyn.

A shocking tragedy was enacted in the Ninth ward on Sunday morning (yesterday), when a man named Robert Johnson, who was a native of Ireland, was found dead in the street, with a knife in his back, and a bloody wound on his forehead.

It appears that about half past one o'clock, three young men, named Charles Johnson, Robert Johnson, and Patrick McDonough, passed by the corner of Fulton and Broadway streets, on their way to Bedford. They saw three men lying on the edge of the sidewalk, one being in the gutter. They appeared to be asleep, and were probably intoxicated.

The three men got up and went home. Two of them paid no attention to him; but on taking hold of Gorman by the leg, he sprang up, and as quick as thought thrust the blade of a dirk knife into his abdomen, and followed it up until he had inflicted four deep gashes, each one of which was sufficient to produce death.

The three men then ran away, and were followed by a crowd of people. They were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets.

The three men then ran away, and were followed by a crowd of people. They were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets.

The three men then ran away, and were followed by a crowd of people. They were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets.

The three men then ran away, and were followed by a crowd of people. They were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets, and were seen to enter a house on the corner of Fulton and Broadway streets.

Continuation of the Heated Term.

THE HOT WEATHER OF THE LAST THREE DAYS AND SEVERAL WEEKS. Some people are disposed to be facetious when speaking of the weather, but the intense heat of the last three days is anything but funny, and an individual who could get a joke with the thermometer at an average of 92 degrees in the shade, must be possessed of the coolness of a refrigerator.

The extreme heat we have been suffering under is rendered more intolerable by the coolness of the season we have just passed through. We were unaccustomed, and therefore felt it the more. There is this peculiarity about it, also, that even in the morning and evening there is not a breath of air stirring to relieve the slightest degree the overpowering heat.

The sun yesterday glared down all day long, without a speck of cloud to dim its intense brightness. The streets looked deserted, and those who could find the city and its people to be a great deal cooler than they are now.

The sun yesterday glared down all day long, without a speck of cloud to dim its intense brightness. The streets looked deserted, and those who could find the city and its people to be a great deal cooler than they are now.
